

Oil & Gas | Delivering Innovation

Kemira

Solutions to help your business reach new heights

You get a global partner

Kemira's advanced technology is designed to improve the performance and profitability of oil/gas producing operations. No matter where it happens in the world, the Gulf of Mexico or the North Sea, Canada, West Africa or Middle East, the Pacific Rim or Latin America, Kemira is there to lend our expertise to help you grow your business.

Backed by highly qualified application specialists, quality manufacturing and sophisticated supply chain management, Kemira is a leader in the development of high performance chemistries engineered to meet demanding customer needs.

You get quality engineered products

Kemira offers a broad range of innovative products formulated to create cutting-edge solutions throughout the entire oil producing value chain: from drilling and drilled solids treatment, cementing and well stimulation, to production and enhanced oil recovery and refinery.

Our products include fluid loss control additives, viscosifiers, shale inhibitors and stabilizers, thinners, rheology control additives, bentonite extenders, flocculants, coagulants, friction reducers, scale inhibitors, dispersants, mobility control polymers, biocides, defoamers and many other fine quality products.

Quality Engineered Products

Antiscalants
Bentonite extenders
Biocides
Coagulants
Defoamers
Dispersants
Drilling fluids
Flocculants

Fluid loss additives
Friction reducers
Foamers
Mobility control polymers
Rheology modifiers
Shale inhibitors and stabilizers
Thinners
Viscosifiers

You get improved efficiency

Kemira offers a large selection of groundbreaking chemical extraction and process solutions for the oil and gas industries, where water plays a central role. Utilizing our expertise, our customers are able to improve their efficiency and productivity.
